## 1.D. Expirations – Transfers between departments.

Normally it is not of much use although it may seem strange, since the food is bought to be consumed, and in the case that it is not consumed, it is lost.

However, there are certain articles that can be interesting to control their expiration date, such as Minibars in High Standing Hotels that, due to their customer profile, work with HIGH VALUE food, such as Swiss Cheeses, Belgian Chocolates, ..., and with certain expiration dates.

It is assumed that the Merchandise has previously entered a general Warehouse and is transferred to the different warehouses. At this moment is when we are asked for the EXPIRY DATE and the "LOT".

## 1.E. Expirations – Consumption by Department.

We locate the LOTS that we have and we give the CONSUMPTION.

It is obligatory for those products that treat CADUCITIES, to give the cancellations (consumptions), in this section, if they are wanted to control.

The screenshot displays a software interface for managing product expirations. At the top, the breadcrumb navigation reads 'Menú Principal / Tratamiento Compras / Pedidos / Caducidades Consumos por Dept.' and the user is identified as 'admin'. Below the navigation is a search bar and a table of product data.

Depto.	Nombre Depto.	Familia	Artículo	Descripción	Fecha cad.	Unids.	Un. Cons.	Un. Rest.	P.C.M.
11	MATERIAL RESTAURANTE	107	10700055	RODAJAS DE MERLUZA	22/05/2016	8.00	5.50	2.50	24.80
11	MATERIAL RESTAURANTE	108	10800010	CIGALAS	22/05/2016	3.00	0.00	3.00	32.25

Below the table is a dropdown menu set to '100' and a pagination control showing page '1'.

An 'Editar consumo' modal window is open, showing the following details for the selected product:

Fecha cad.	Depto.	Artículo	Descripción	Exis.	Unids. Total	Un. Cons.
22/05/2016	11 MATERIAL RESTAURANTE	10700055	RODAJAS DE MERLUZA	2.50	8.00	5.50

Additional fields in the modal include 'Fecha' (22/05/2016), 'Unids.' (3.1), and 'Tipo' (Consumos).
