6. Inventory Control / Historical

6.8. Correction Zero Units = Zero Amount

Class One

The manipulations, entries, exits, transfers, corrections and a very long etc., that are carried out in the Warehouses, can originate that in some cases there are articles whose stocks are to ZERO and have a value. The reason is simple, since the inventory is constantly being valued depending on the costs that are attributed to it, as well as when transferring an article to another department, the total amounts may have changed and if we do it correctly there would be a margin (+/-), in the Warehouse of origin, and other very varied similar cases.

To solve this type of "problems", this utility has been enabled

Main menu / Inventory Control / Correction zero units -> zero amount User: admin1
