# Treatment of units and/or boxes

# Treatment of units and/or boxes

## FAQS

Explanation:

Article registration, field purchase unit):

If you put a 1-> Units, ie when you go to load delivery notes (3.1), and only allows you to enter units (You can see how the cursor is placed in the field "quantity")

If you put a number greater than 1 -> Boxes, that is when you go to load delivery notes, as soon as you put the article code a message appears that says: "enter the entry boxes: ", if you put 0 it allows you to put units, and if you put any other number they will be boxes, then it multiplies the boxes by the number of purchase units.
