

Bar/Coffee Bar Printers

March 2.016

StarPOS (Option .B.7.Printers.)

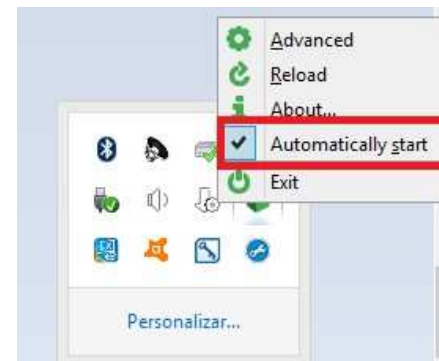

Printers Printer Server.

The QZ print daemon (printer server) must be installed in the CLIENT station where you want to configure the printers. You must install the version we provide: <http://www.reservahotel.com/old/descargas/QZ/qz-tray-classone-2.0.7.exe>

User: classone - Password: c1

Once finished, an icon will appear in the Windows notification bar in the form of a green or red cube, depending on whether the QZ is active or not..

Clicking on the icon will result in a drop-down menu in which we have to mark the option "Automatically start" to start each time the computer is turned on.

StarPOS (Option .B.7.Printers.)

Printers Definition.

Id.	Name
1	Area 1
2	Area de cocina 2

Name in system	Tickets	Range	Printer area	Divide per macrogroup	Pr. qualifiers	Pr. all whole command	Orders	Macrogroup
tck	✓	✗	Area 1	✗	✗	✓	✗	All
Epson-TM-T20II	✓	✗	Area 1	✗	✗	✗	✗	All
HP OfficeJet 6950 PCL-3 (Red)	✓	✓	Area 1	✓	✓	✓	✓	All

Conceptually you can have them:

➤ TCK printers, assigned to each POS, which will be where the TCK are printed.

➤ Area Printers, also known as KITCHEN printers, as this is where the PLATES to be cooked or the DRINKS to be served will usually be printed..

➤ Range Printers. Its function is to control the service areas of the different waiters, to know at all times what should be served to each TABLE, or, if you have to put cutlery, ...

➤ ORDER printers. Where they will print all the orders that they make to us, so much from Smartphone as telephonically.

Macrogroup: All [dropdown]

Option .B.7.Printers.

Printers Assignment.

When you enter the application, and especially the first time, asks us to assign the printers associated with that POS, then the system will always remember which printers have been assigned.

The screenshots illustrate the printer assignment process in the POS system. Each interface includes a top navigation bar with icons for Department, Cashbox, Employee, and Printers. A keyboard is visible in the background of each screen.

Screenshot 1 (Left): The 'Printers' dropdown menu is open, showing a list of printer options. The first option, 'Tickets - tck', is highlighted in blue. Other options include 'Tickets - Epson-TM-T20II', 'Tickets - HP OfficeJet 6950 PCL-3 (Red)', and 'Range - HP OfficeJet 6950 PCL-3 (Red) (All)'. The background shows the 'Department' field set to '21 - BAR PANORAMA' and the 'Cashbox' field.

Text: We can have in addition to a printer of Tickets, also printers of RANGE or of AREA, associated to the above mentioned TERMINAL

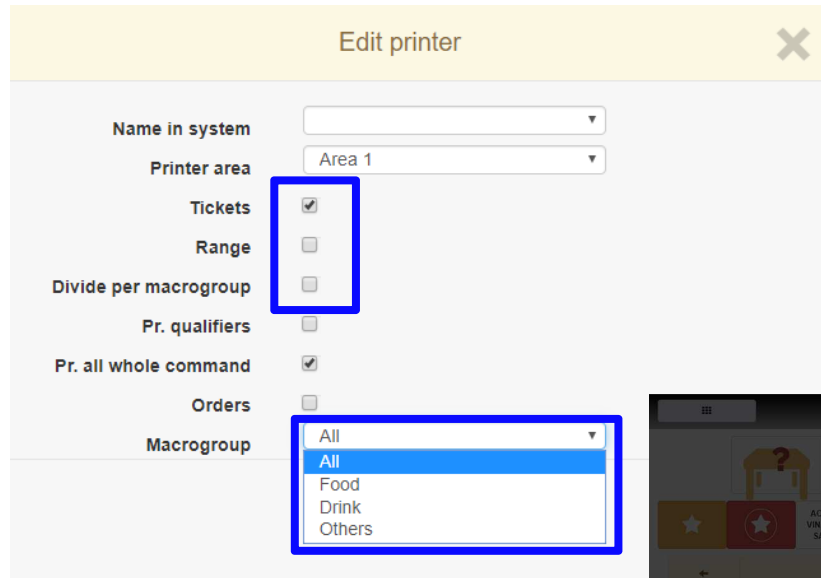

Screenshot 2 (Middle): The 'Printers' dropdown menu is open, showing the same list of printer options. The first option, 'Tickets - tck', is highlighted in blue. The background shows the 'Department' field set to '21 - BAR PANORAMA' and the 'Cashbox' field set to 'Cashbox - 1'.

Screenshot 3 (Right): The 'Printers' dropdown menu is open, showing a list of printer options. The first option, 'Tickets - HP OfficeJet 6950 PCL-3 (Red), Tickets - HP OfficeJet 6950 PCL-3 (Red)', is highlighted in blue. Other options include 'Tickets - Epson-TM-T20II', 'Tickets - HP OfficeJet 6950 PCL-3 (Red)', and 'Range - HP OfficeJet 6950 PCL-3 (Red) (All)'. The background shows the 'Department' field set to '21 - BAR PANORAMA' and the 'Employee' field set to 'M Angel'.

Option .B.7.Printers.

Functioning Range Printers.

You must define in Printers that it is Range. If it is also a Ticket, you must put it twice in the corresponding Department (one as tickets and the other as Range).

Edit printer

Name in system: [dropdown]

Printer area: Area 1 [dropdown]

Tickets:

Range:

Divide per macrogroup:

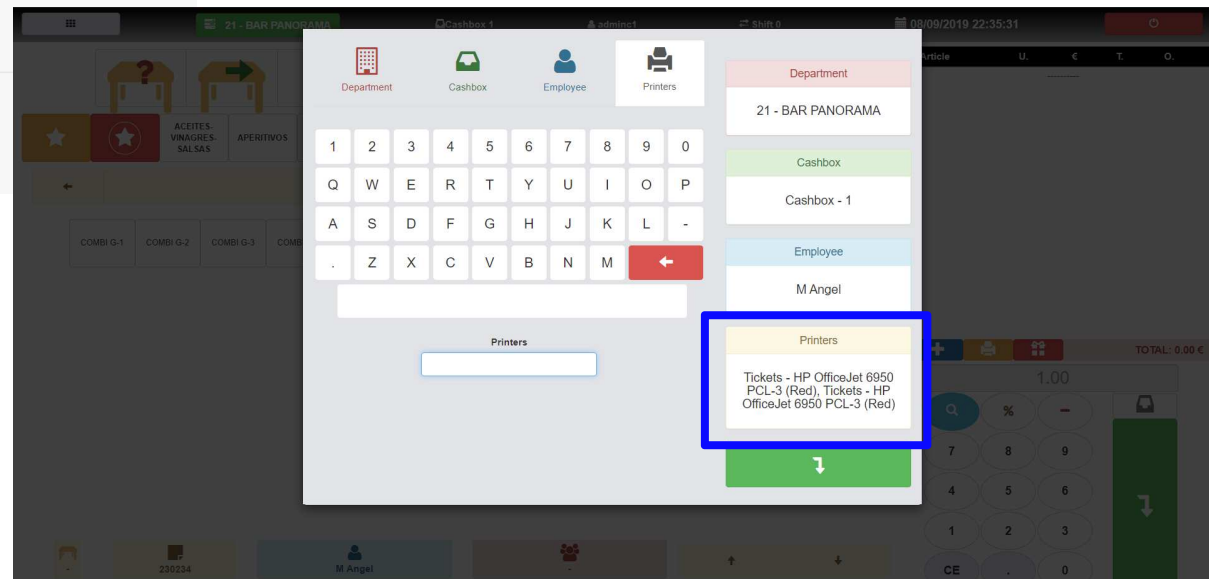

Pr. qualifiers:

Pr. all whole command:

Orders:

Macrogroup: [dropdown menu with options: All, All, Food, Drink, Others]

The macro-group value of the printer defines which articles will be printed. Let's imagine that we have a printer of Range and we want that in that Range it only prints Beverages, it will print us only the drinks.

Department: 21 - BAR PANORAMA

Cashbox: Cashbox - 1

Employee: M Angel

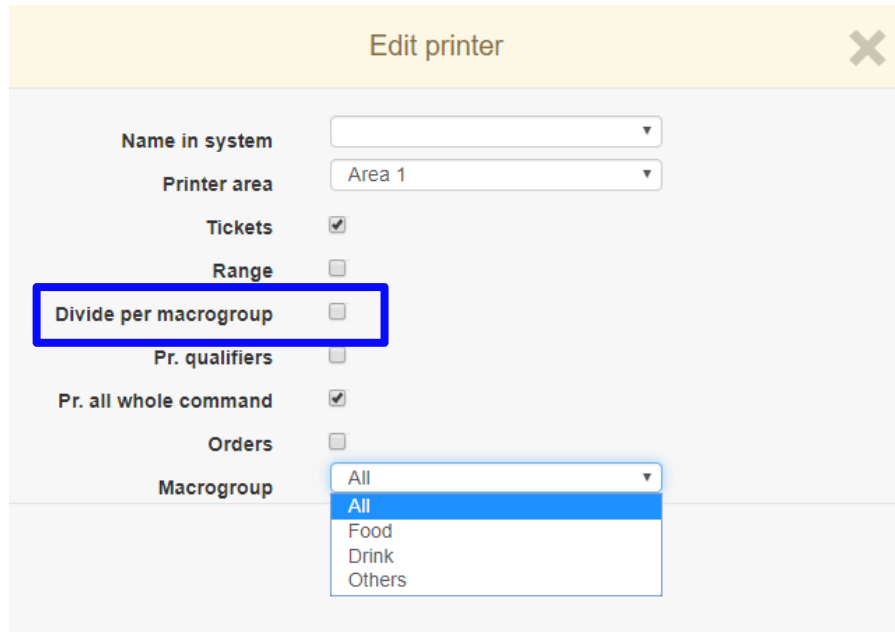

Printers:

- Tickets - HP OfficeJet 6950 PCL-3 (Red)
- Tickets - HP OfficeJet 6950 PCL-3 (Red)

Option .B.7.Printers.

Functioning Divide Macro-groups.

If you enable the function of dividing Macro-groups, it will be printed where it corresponds, grouping the articles and separating them by a line by Macro-groups

Edit printer ✕

Name in system

Printer area

Tickets

Range

Divide per macrogroup

Pr. qualifiers

Pr. all whole command

Orders

Macrogroup

- All
- Food
- Drink
- Others

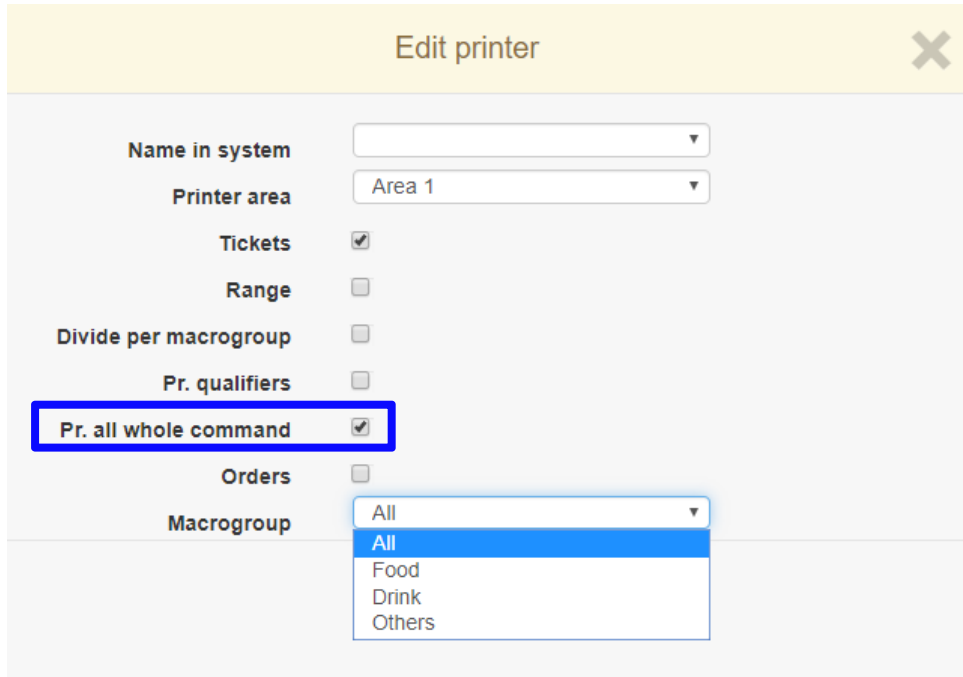

Will do in Ranges/Kitchen, if you have food and beverage items, will make two separate tickets

Option .B.7.Printers.

Functioning Complet command.

When we use this option, we will print in the kitchen areas, always the full command, regardless of whether there are items that do not correspond to that area. Ads that do not correspond to that area will be printed in small print.

Edit printer [X]

Name in system [dropdown]

Printer area [Area 1]

Range

Divide per macrogroup

Pr. qualifiers

Pr. all whole command

Orders

Macrogroup [All]

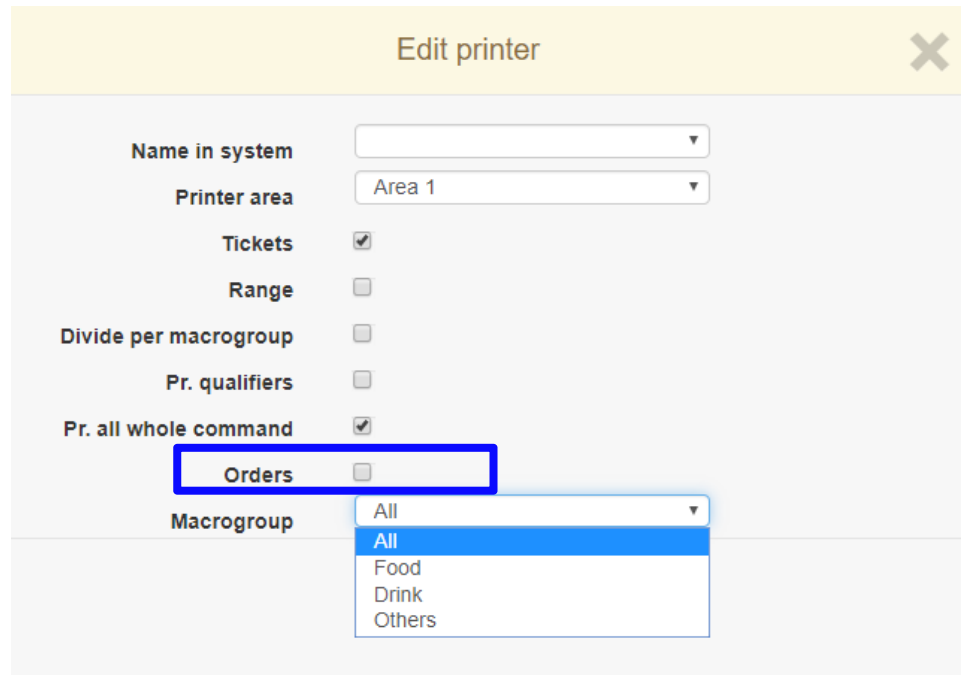

- All
- Food
- Drink
- Others

Option .B.7.Printers.

Functioning Orders Printers.

When we use the order option, indicating that it is an Order Printer, we will print all orders on that printer, plus the corresponding kitchen areas if any.

Dialog box titled "Edit printer" with a close button (X).

Fields and options:

- Name in system: [Dropdown]
- Printer area: [Area 1] [Dropdown]
- Tickets:
- Range:
- Divide per macrogroup:
- Pr. qualifiers:
- Pr. all whole command:
- Orders: (highlighted with a blue box)
- Macrogroup: [All] [Dropdown]

The "Macrogroup" dropdown is open, showing options: All, Food, Drink, Others.

Option .B.7.Printers.

Functioning kitchen Printer

The Kitchen (Areas) printers are global to the system, the items to be printed on these printers will be assigned in the Price List.
