# Accounting

The system has an accounting tool in which you will be able to see all your SALES movements of the different Departments, classified by accounting accounts that you will configure to your liking.

In **BAR/Coffee** Bar the accounting accounts of Sales will be for Food/Beverage/Others of each Department, and in **Retail** they will be grouped by the different FAMILIES of articles.

This data can be easily exported to any accounting application, as well as to CSV, PDF or text.
