Theoretical Sales by Consumption

April 2018

Theoretical Sales by Consumption

Indicating to us the system what we should have collected according to the consumptions that we have had of a department or of the set of several departments, according to the annotations that we indicate it.

The screenshot shows a software interface for 'Warehouse Control / Daily of goods issues'. On the left, there is a filter panel with the following options:

- By Dept.-Family-Article
- By Dept.-Date
- By Family-Article-Date
- By Date-Family-Article
- Consumption/Theor. sale price**

The filter panel also includes fields for 'Date' (01/09/2016 to 30/09/2016), 'Dept.', and 'Family', along with checkboxes for 'Detailed list', 'Consumptions', 'Losses', 'Sales', and 'Readjust'. A refresh button is at the bottom of the filter panel.

The main table displays the following data:

Article	Description	Units	Total Amount	Total Theo. price
21 - BAR PANORAMA				
2240008	MARTINI ROJO	0,08	0,52	0,01
