

StarBEO Demo

Basic Capacity Tests

Presentation

StarBEO is part of the **StarEcon** system as an independent module, although it is totally interrelated with the management of the Warehouse, Restaurant and Hotel, from which it obtains most of the information with which it operates.

The StarME application has a series of utilities that allow optimizing the Event Management:

Service Order.

Complete management of the different SO (BEO, Banquet Event Order) of the System: Identification and Analysis of the associated information. Complete follow-up : Quotation, Client Communication, Realization, Cost and Failed.

Commercial Management.

Agility in the preparation and presentation of any Budget. Tracking of Pending, Budgeted, Completed and Failed Notifications System

Customer Management.

Automated sending to customers (email, SMS,...). Integral Management of Clients. Reuse of BEOs (Boards of Directors, company meetings, "same or similar" wedding, etc.)

Booking.

Connection with Hotel Halls. Visual calendars (optimization of planning processes) Possibility of assigning different statuses to each BEO, to improve Booking Management

Recipes.

It integrates and complements the management of Restaurant Dishes. Profitability Analysis by Menus and/or Dishes

Inventory / Purchases.

Study of purchase needs considering the real stock of our Warehouse. It helps to carry out purchase calculations for a BEO, for a specific period, etc.

StarBEO, offers an integral solution for the management and control of the Events. It offers, among others, the following functionalities

- ❖ What events have been, are being and/or will be held
- ❖ The management of events and their files, fully automated (both for the client and internally between the different departments involved)
- ❖ Booking with User Interface in visual mode, for the best planning of the rooms.
Interconnected with Seven Stars (PMS, Integral Hotel Management)
- ❖ Profitability analysis (individual, global, between dates, etc.), including details regarding recipes, menus, service orders, etc.
- ❖ Purchase forecast considering the foreseen Events (making the necessary information crosses with the StarEcon Warehouse system)
- ❖ Etc.

For more information, see the attached document (2014): [Presentación StarBEO](#)

Basic Capacity Tests

Presentation

We have prepared a real demo on one of our servers:

<http://213.60.47.88:9091/menuEngineering/en/>

User: admin41
Password: admin31

In this demo you will find enough data to do the tests you want.

We ask that the tests you wish to carry out be as logical as possible, since it is not only you who will access this demo, but also a series of other people who, like you, wish to evaluate our applications live.

If the data you are testing is very large, please note that it may take a while for it to load on your computer. It is advisable to have a good Internet connection and not to spend excessive periods of time for greater agility.

Navigation Systems

We have wanted to maintain the hierarchy of Menus because it is very easy to explain where when you require the maintenance service. The navigation systems of the Application, besides being managing a browser, are the following:

Módulos 1.1.0.0.1 | **Main menu** | User: adminc1

Upper bar.
Pressing directly any previous option

Expert Menu.
Pressing the number/letter of the option is accessed directly to the same

Icons

- Site Map
- SO Creation
- Manuals
- Snd Email
- Favorites
- back
- Web Configuration
- Graphics
- Send SMS
- Historical
- Power

POS

No Notification, 19 Delays

Main menu

1	Service orders	A	Master Files
2	Halls booking	B	Backoffice
3	Service orders status	C	Accounting - Invoicing
4	Service orders reports	D	Business Intelligence
5	Cost analysis/Budgets	E	CRM
6	Needs study	F	
7	Consumptions attribution to BEO	G	Utilities
8	Expenses attribution to BEO	H	
9	Comparative budget vs real cost	I	

Menu Hierarchy.
Pressing the option and/or the letter / number

Notifies us if there are any outstanding notices that we have not attended, and if we have delays at SO with respect to the current date

If we click on warnings, it tells us which ones are pending

Basic rules Class One systems

Navigation Systems. Favorites / History

As we have seen we have 2 icons:

Access to Favorites, in which we can define for each user what their Favorites are within the Application.

Access to Historicals, it shows us the last options that this user has accessed.

Operational Mechanics

With INTRO, or TAB, you advance FIELD. With ESC or MAY+TAB, you go back to FIELD.
If you are in the first FIELD and press ESC, you go back to the previous option.

The screenshot shows the 'Inventory Control / Inventory in specific date' screen. The breadcrumb 'Main menu / Inventory Control / Inventory in specific date' is highlighted with a red box. A red arrow points from this box to a red callout box containing the text 'Salirse de la aplicación'. Another red arrow points from the top right corner of the application window to a second red callout box containing the text 'If we click with the mouse directly on the upper sections we access directly to the options'. The interface includes a search bar, filter options (Historical, Avg. purch. pr., Last purch. pr., Historical without (-)), date selection (16/01/2019), and a table of inventory items with columns for Family, Article, Description, Units, and Amount. A pagination bar at the bottom shows page 1 of 163.

Basic rules Class One systems

Operational Mechanics

The screenshot shows the 'Inventory in specific date' report in the Class One system. The interface includes a search bar, a filter sidebar, a data table, and a pagination control.

Options and Filters: A sidebar on the left contains filter options: Historical, Avg. purch. pr. (selected), Last purch. pr., and Historical without (-). It also includes input fields for Department, Family, and Article, a Date field set to 16/01/2019, and checkboxes for 'Total By Family' (checked) and 'Omit articles without stock'.

Execute: A circular refresh button is located at the bottom of the filter sidebar.

Show-Hide Filters and Options: A double arrow icon is positioned between the filter sidebar and the table.

Number of records per page: A dropdown menu below the filter sidebar is set to 50.

Page number where you are: The pagination control at the bottom right shows page 163 is selected.

Totals on the last page: The table's final row, 'Total List', shows a total of 101.650,97 units and 115.975,44 amount.

Family	Article	Description	Units	Amount
		Total Family 401	0,00	0,00
		Total	0,00	0,00
		Total List	101.650,97	115.975,44
