# **Installation/Assembly POS QZ Printers Installation Chrome Kiosk Extension**

# Installation/Assembly POS QZ Printers

First of all make sure that you have Java installed, if not, we can download and install it  
<https://java.com/es/>

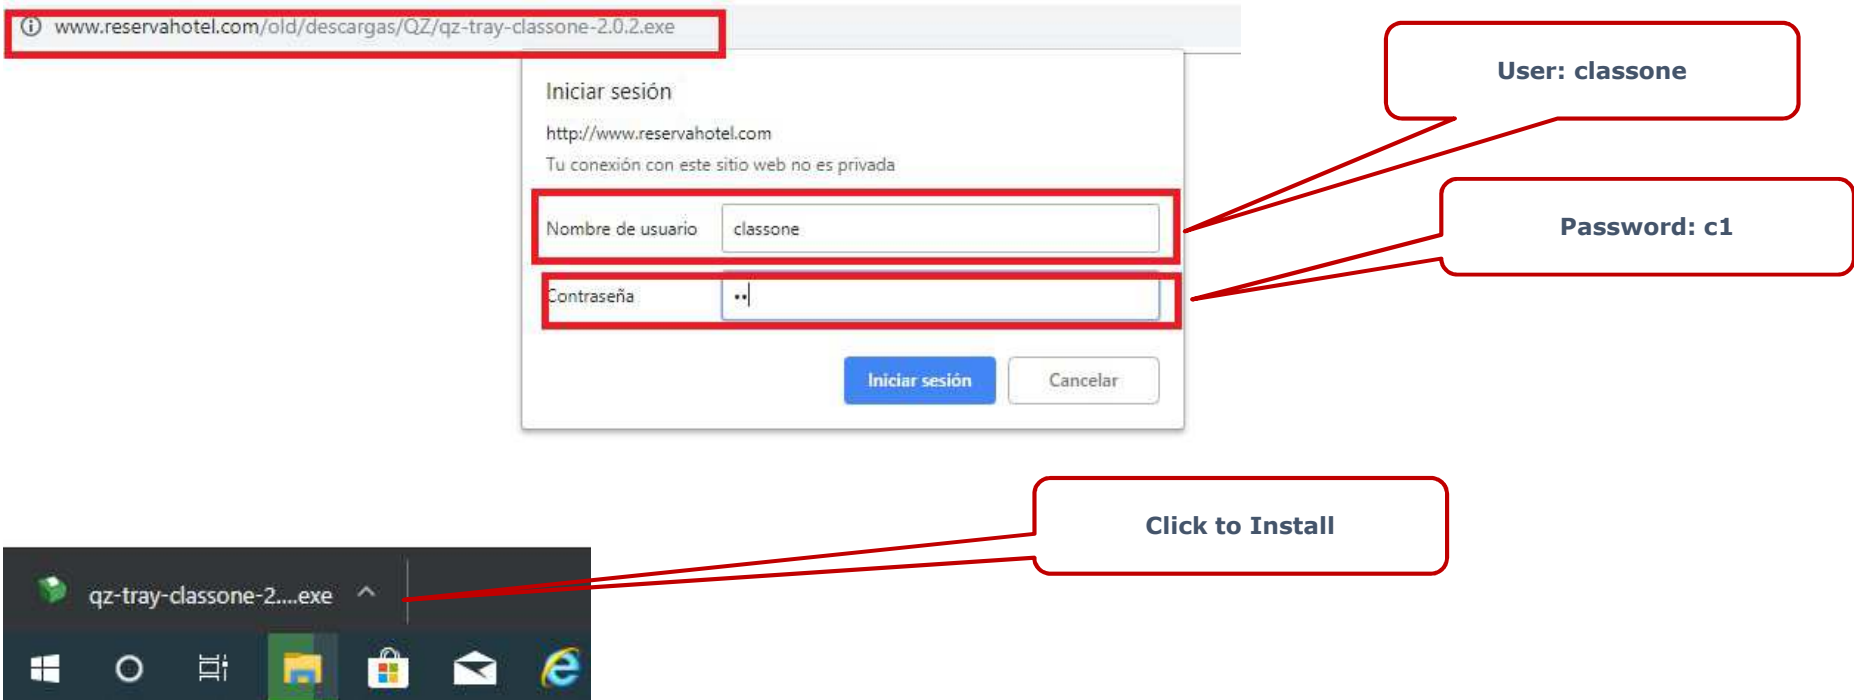

The image shows a browser window displaying the Java website in Spanish. A red callout box points to the 'Descarga gratuita de Java' button with the text 'Click here to download'. Another red callout box points to the 'Aceptar e iniciar descarga gratuita' button with the text 'We accept and start the download'. A third red callout box points to the 'jre-8u211-window...exe' icon in the Windows taskbar with the text 'Click to Install'. To the right of the taskbar, a text box states: 'We proceeded with the installation in the same way as we would install any other program'.

# Installation/Assembly POS QZ Printers

## Downloading and Installing QZ

<http://www.reservahotel.com/old/descargas/QZ/qz-tray-classone-2.0.7.exe>

The image shows a login dialog box titled "Iniciar sesión" for the website "http://www.reservahotel.com". The dialog box contains two input fields: "Nombre de usuario" (Username) with the value "classone" and "Contraseña" (Password) with the value "c1". Below the fields are two buttons: "Iniciar sesión" (Login) and "Cancelar" (Cancel). A red box highlights the address bar of the browser window showing the URL "www.reservahotel.com/old/descargas/QZ/qz-tray-classone-2.0.2.exe". A red callout box points to the "Nombre de usuario" field with the text "User: classone". Another red callout box points to the "Contraseña" field with the text "Password: c1". A third red callout box points to the "Iniciar sesión" button with the text "Click to Install". Below the dialog box, a Windows taskbar is visible with the application icon "qz-tray-classone-2...exe" highlighted, and a red callout box points to it with the text "Click to Install".

# Installation/Assembly POS QZ Printers

## Downloading and Installing QZ

<http://www.reservahotel.com/old/descargas/QZ/qz-tray-classone-2.0.7.exe>

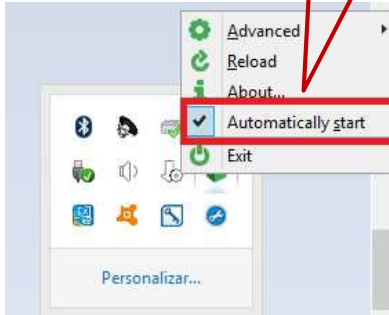

Click on "next" and install the program

When finished, an icon will appear in the Windows notification bar with either a green or red formacube, depending on whether the QZ is active or not.

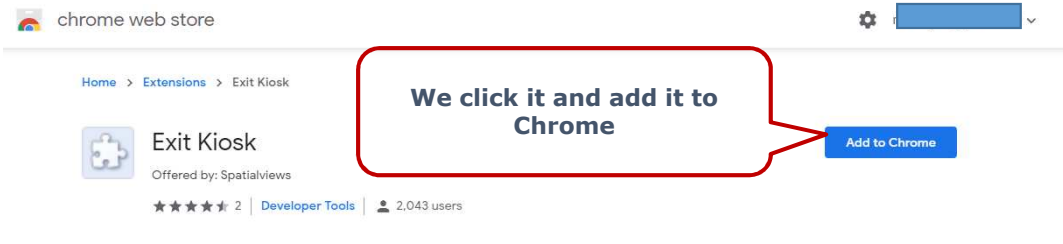

By clicking on the icon a drop-down menu will appear in which we have to check the option "Automatically start" so that it starts every time the computer is turned on

# Installation Chrome Kiosk Extension

## Installing Kiosk extension in Google Chrome

<https://chrome.google.com/webstore/detail/exit-kiosk/oickijkfojmejjbbhainpjapbkkippen?hl=en-GB>

Create the shortcut from the Google Chrome shortcut and add in "Destination" the URL that corresponds to the server, usually in the style "192.168.1.1": --kiosk http://<URL>:9091/pos/ en (If you do not want to work with the full screen application remove the "--kiosk")

We added the name of the shortcut

In the icon where we save the direct access → button derecho → properties  
In the shortcut tab we write the destination and accept
