i: insert / m: edit / d, sup: delete

Article	Description	Source dept.	Target dept.	Rat./Un.	Boxes	Units
1110003	SALMON FRESCO	00	25	1	0	1.26

The first thing we must give is the confirmation of the total number of people, the total amount of the SO, the date that the CONSUMPTION is made, the Relevé (consumption count) that is assigned to it and the Department Origin of the Goods.

Next, all the articles that have been consumed in the SO will be given.

StarME, performs the following steps:

- 1) Confirm the SO as done with the previous data.
- 2) Make a transfer from the Origin to the Destination department of the SO of all the articles that have been consumed in said SO.
- 3) Consume the previous articles in the Destination department.
