2. Quotas
3. Special Promotional Rates
4. Close Dates
5. Export

StarMR Functionalities

Operative Hotel. Mapping of the booking engine

Definition of Engine Mapping. Option .1.9.A.StarMR

You must create an Agency for the Engine to call it for example WWW, as well as a Rate with the same name to use in the Engine.

Main menu / OTA's management / 9.A. Master Connection OTA's User: admin1

Common	Agency	050	HOTELPLAN IN, REISORG	Extranet	<input type="text" value="http://213.60.47.88:9091/booking/"/>

Operative Hotel. Mapping of the booking engine

Rates / Calculation of Non-Refundable Rates

- Save
- Rates**
- Rooms
- Add-ons
- Delete
- PING
- Force send inventory
- Send Inventory
- Send Clients
- Reservation polling

We will create the different rates according to the Engine (10,11, ... 90), 91, ...

This will be the Base rate on which the Hotel will be based when it comes to exporting prices. It will also be used to calculate the prices of the Non-Refundable Rates.

Rate OTA	Rate PMS	% Allotment	Board	Promotional Code	Date from	Date to	Non refundable	Early Bird
10	BAR1	100.00					✓	✓
21	BAR1	100.00					✗	✗
91	BAR3	100.00					✗	✗

Non refundable configuration:

- Rate OTA: 11
- % Allotment: 100.00
- Day 1: 45, % Discount 1: 5.00, MinLOS 1: 1
- Day 2: 65, % Discount 2: 15.00, MinLOS 2: 5
- Day 3: [empty], % Discount 3: [empty], MinLOS 3: [empty]

Early Bird configuration:

- Rate OTA: 21
- % Allotment: 100.00
- Day 1: 90, % Discount 1: 10.00, MinLOS 1: 5
- Day 2: [empty], % Discount 2: [empty], MinLOS 2: [empty]
- Day 3: [empty], % Discount 3: [empty], MinLOS 3: [empty]

In the first screen of the Mapping we have the data to make the calculations of the Non-refundable Rates.
We can actually do a Non-Refundable + Early Booking

The system calculates as follows:
From day 45, it applies a 5.00% discount on the "BAR1" rate, until day 65 of the current date.
From day 65 onwards, a 15.00% discount is applied to the "BAR1" rate.
From day 45 to day 65 you must have a minimum stay of (in this case one day)
From day 65, you must have a minimum stay of (in this case 5 days)

Operative Hotel. Mapping of the booking engine

Mapping Rooms with the Engine.

-
-
-
-
-
-
-
-
-
-

It is necessary to give the equivalences of the Rooms that we have created in the Engine with which it has the PMS

- We indicate that Room "D" of Engine is equivalent to PMS Room "D"
- Occupancy can be up to 2 pax (D 2)
- We give availability according to the quotas of 100,00%.

Room types x

Rate:

Room type PMS: Max Occ.:

Room PMS	Max. Occ.	Room OTA 1	% Allotment	% Rate	Room OTA 2	% Allotment	% Rate	Room OTA 3	% Allotment	% Rate	Room OTA 4	% Allotment	% Rate	Room OTA 5	% Allotment	% Rate
D	2	D	100.00	0.00												
DS	2	DT	100.00	0.00												

Room type OTA

Room type OTA	% Allotment	+/- % Rate
<input type="text" value="D"/>	<input type="text" value="100.00"/>	<input type="text" value="0.00"/>
<input type="text"/>	<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>	<input type="text"/>

<input type="text" value="Standard"/>	<input type="text" value="Room"/>	<input type="text" value="B&B"/>	<input type="text" value="Half board (YYN)"/>	<input type="text" value="Half board (YNY)"/>	<input type="text" value="Full board"/>	<input type="text" value="All included"/>
<input type="text" value="Non refundable"/>	<input type="text" value="Room"/>	<input type="text" value="B&B"/>	<input type="text" value="Half board (YYN)"/>	<input type="text" value="Half board (YNY)"/>	<input type="text" value="Full board"/>	<input type="text" value="All included"/>
<input type="text" value="EarlyBird"/>	<input type="text" value="Room"/>	<input type="text" value="B&B"/>	<input type="text" value="Half board (YYN)"/>	<input type="text" value="Half board (YNY)"/>	<input type="text" value="Full board"/>	<input type="text" value="All included"/>

We can give up to 5 rooms associated with the first one.

Imagine that in Hotel we have Double Rooms, and in the Booking Engine we have Double, Double with Sea View, Double Inferior Floors, ..., if we wished that the quota of the Double is, 60,00%, the one of Vista Mar 30,00% and the one of Inferior Floors 15,00% (They do not have to add 100,00%).

And in addition, the Sea View Room we want that they are 20,00% more expensive and those of inferior Floors a 15,00% cheaper.

Operative Hotel. Mapping of the booking engine

Operative Hotel. Booking Engine Quotas

Warning.

Once the quotas have been defined, the QUOTA REGENERATION OPTION MUST ALWAYS be passed, if this is not done it is as if the quotas or modifications had not been made

The screenshot displays the 'Allotment and release management' interface. At the top, the breadcrumb trail reads 'Main menu / OTA's management / 9.9. Allotment and release management' and the user is identified as 'User: adminc1'. A search bar on the left contains a magnifying glass icon and a search input field. Below the search bar are several filter options: 'Date from' (23/10/2019), 'Date to' (23/11/2019), 'Agency', and 'Room type' (All). A refresh button is located below these filters. The main area shows a table with columns: Date, Room type, Min advance, Allotment, Used allotment, Forecast, Bookings, Confirmed, Attempted, % Allotment, and Free. The table is currently empty, with a 'Dates between: 23/10/2019 - 23/11/2019' filter applied at the top.
