Concepts

External reservations. We call External Reservations or Draft copy Reservations, to Reservations that we do not consider for the purposes of the Booking. It can be applied for several cases, for example:

- If we want to cancel a reservation but we do not want to lose the data, as it may be reactivated, (by canceling it we are asked if we want to pass it to the Reservations Draft.
- Somebody call us to ask us for a budget but they are not sure yet if they are going to do it.
- We are overbooked and we want to have reservations in case we miss any last minute reservation.

Voucher. Voucher number, Voucher, Rooming List number, Bonus, Group Identifier.

CIF. CIF/DNI/CNPJ/CPF.

Tarjeta: Seven Stars Card, Apartment, Inscrição Estadual IE

The reservation consists of two parts:

General or Booker. Who makes the reservation and their data Rooming List. Those who are part of the Reserve

Being in two different parts, the Booker of the Rooming List allows us to have different entry and exit dates for the same group reservation at the entrance.

1.8. Arrivals without Reservation

It is very similar to Reservations Check-in

THE DIRECT CHECK-IN, in version 97.03. it is foreseen for both DIRECT CLIENTS and COMPANIES and / or AGENCIES, this was not the case in previous versions. At present, it asks us for a first field that we will identify if it is DIRECT, AGENCY and / or COMPANY, being able of course to access by different Keys or selection screens, locating its CARDEX, for example, accessing ALPHABETICALLY and being able to check its EXISTENCE, that is to say , if we already have their DATA, it is not necessary to REPEAT them, in the case that it DOES NOT EXIST, we can create the COMPANY and / or AGENCY card, it is this same instant as for DIRECT, with (Esc), we will give your DATA and later or through BILLING or registration of the POLICE card, they will be registered for a subsequent CARDEX.

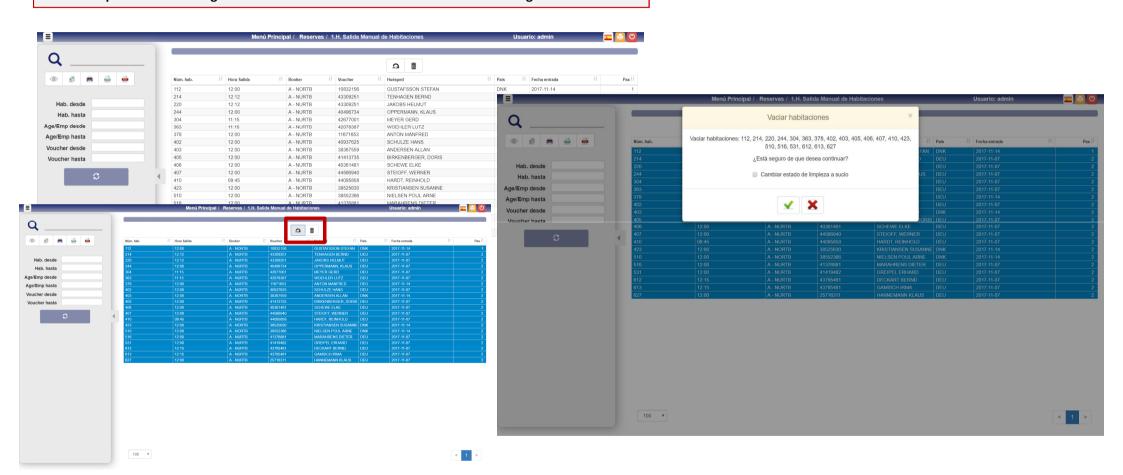

If it already exists in the CARDEX with (F3), we can consult your most important data. SEVEN STARS, let us know if its in BLACK LIST.

1.H. Manual output of rooms

With this option we can deregister those rooms that have left and do not have charges

Well we already have the CLIENT inside the HOTEL, but as we already know, the CLIENT is king, and it turns out that he wants to:

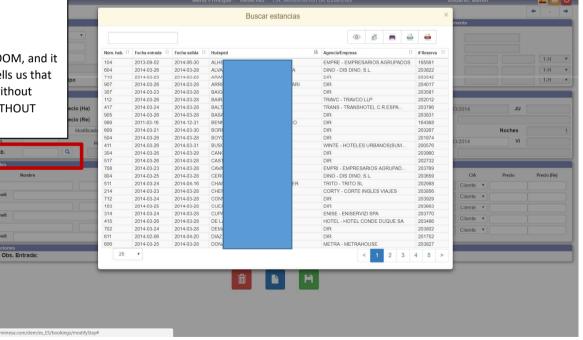

- That the COMPANY is invoiced him and not PARTICULARLY.
- That we change him the applied rate or prices.
- Which advances or delays your DEPARTURE DATE.
- That he wants to CHANGE THE BOARD, since now he want FULL PENSION.
- That he wants instead of DOUBLE USE ROOM, her wife has came.
- He wants to GIVE the NAME of the SECOND GUEST.
- That he wants a GARAGE included daily.
- He does not like the ROOM and wants us to give him ANOTHER.

And a further extension, that the CUSTOMER we gave it discharged, he came to see the ROOM, and it turns out that it is not what HE WANTS, and since we can not give him another room, he tells us that without any further HE GOES, so we must give him it of deregister, without INVOICE and without NOTHING, to not have CHARGES in this same section there is the possibility of OUTPUT WITHOUT CHARGES.

With this option we can modify the data of any of the rooms that we have occupied in the hotel.

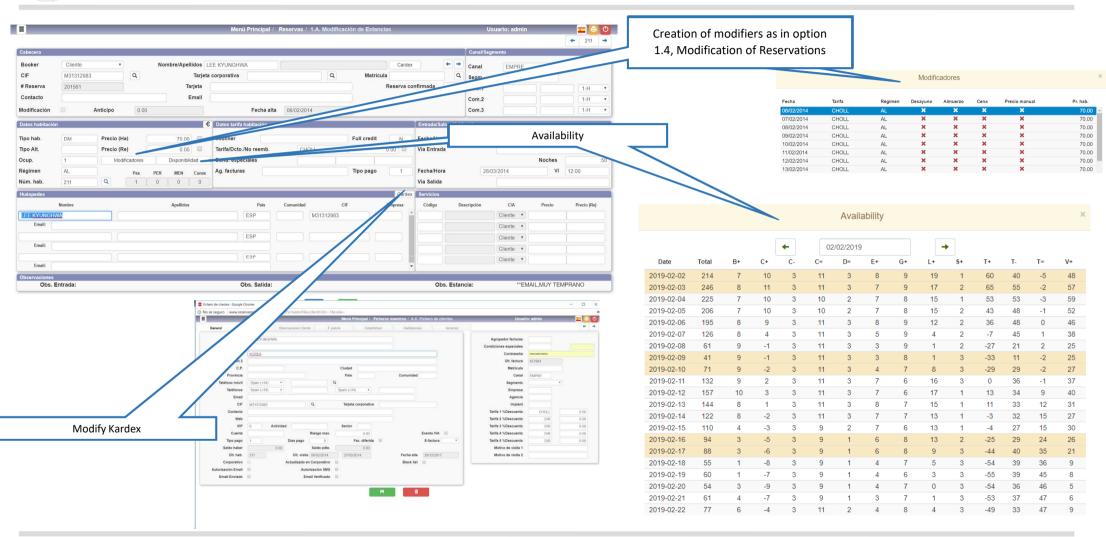

The first data requested by the system is the room number that we want to modify. After completing this mandatory field, we will proceed to modify any of the other fields in a similar way to the Reservations Modification (Option 1.4).

Next, the usefulness of each of the buttons presented in this menu is explained.
