# 1.E. Meals Forecast.

## Diners check

This option is designed to be used by the RESTAURANT staff at meal times. We have to indicate in which session we are (BREAKFAST/LUNCH/DINNER) and for the client that has contracted any of the three meals, a green ok will come out next to them. At the time when the client comes to eat we will click on it, putting an ok in the column next to it, about the service that we have clicked. In the lower part it tells us the number of meals that we have and those that have already been served.
