Advances and Deposits Management.

November 2.017

Why do we differentiate Deposit and Advances?

Advances.

We consider the concept of Advance as an amount to account that in general will be applied later to the payment of an invoice.

A history of all the advances is saved as well as its application.

Deposits.

Deposit is considered those amounts that the client leaves us in pledge, for the loan of a certain service (towels, TV remote, Safe Key, …), and then the amount is returned at the end of the service.
His history is not stored, he dies at the moment in which the return is made to the client.
