Query Client (Cardex)

By means of this option we will obtain a database as the premises that we mark

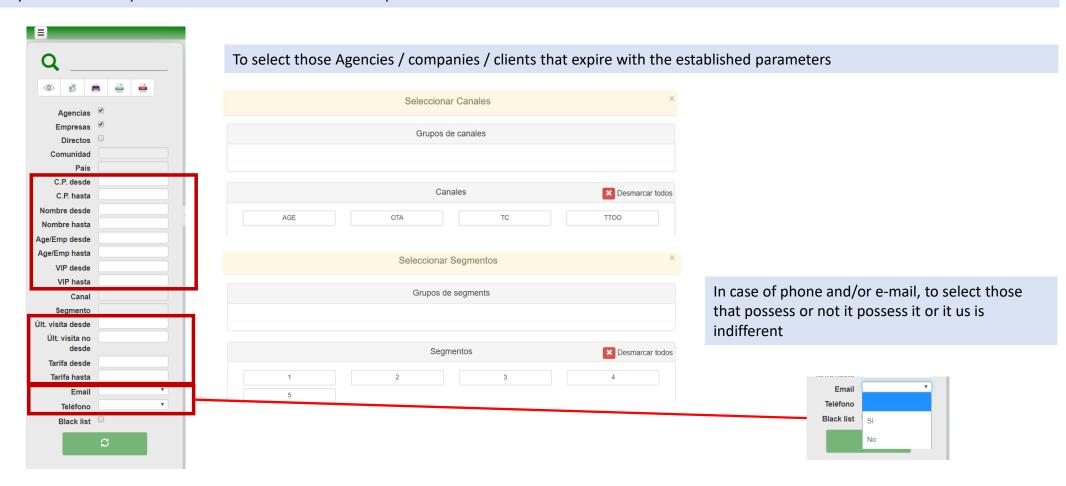

Query Client (Cardex)

By means of this option we will obtain a database as the premises that we mark

Query Client (Cardex)

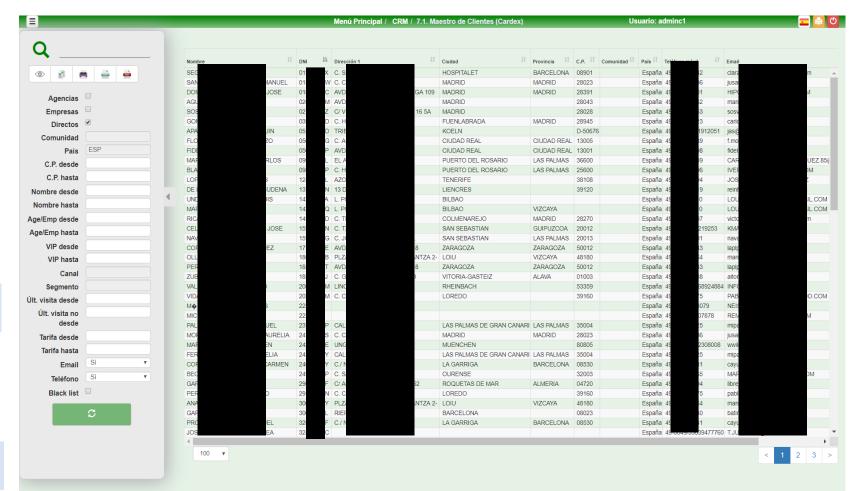

In this example we obtain the database for all those clients who belong to ESP (Spain), and also we possess its phone and its e-mail

Copy and we can paste to Excel

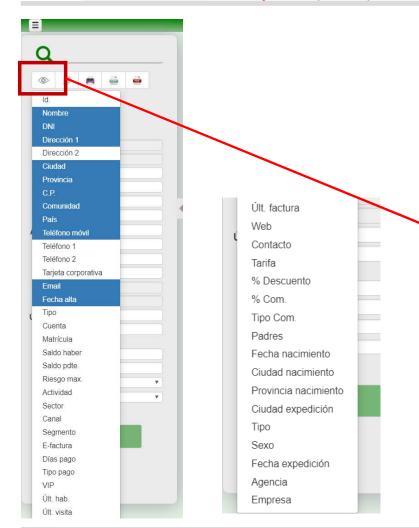

To generate the database in csv format

Query Client (Cardex)

If we touch Visibility, we can see more or less fields of the Database

Query Client (Cardex)

If we have the Database we can export it to any mail/SMS system / ..., for example

https://mailchimp.com/,

To matter subscribers to a List: https://mailchimp.com/es/help/import-contacts-mailchimp/

Profiles for Agency / company

Frames in red the information of the chosen client

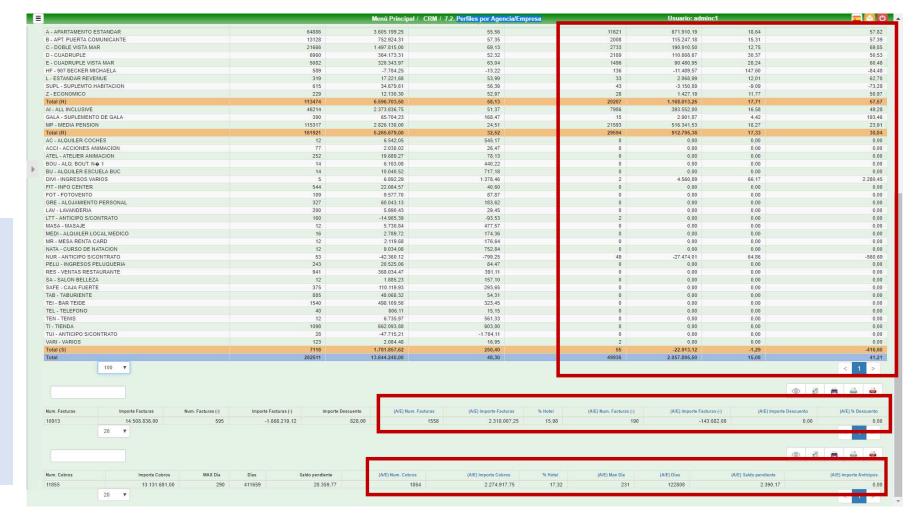

At all times we are compared the entire information of the hotel in the pronounced period, with those of the corresponding Agency / company, knowing therefore the weight of the above mentioned agency on the whole

Profiles for Agency / company

In the last part of this report it represents us, the whole of invoicing carried out in the period and whole of carried out cashings, with what we will know the immobilized technician of the above mentioned client (all the days we are financing of him)

Query Client Histórico

By means of this option we will obtain a database as the premises that we mark
