100 Rooms: 11 Pax: 24 Adults: 22 Children: 2 Avg. stay: 1.00

One of the fundamental characteristics of Seven Stars, is that all the data prevails, for it exists historical of absolutely everything that has been done in the Hotel, in this section it accedes to an important number of Them.

Through this option, we can see any stay or reservation with a date prior to the current day, to consult, for example, why a reservation was cancelled or the prices that were made for a given stay.

With this option we can get a list of customers who entered a certain date range. We will have to tell the system the dates we want to see. If we want to limit the list by a certain field we would have to indicate it also.
