Technology

The technological progress determines our Company culture.

Every day turns out to be stranger to realize daily tasks without resorting to the technology, and it is not possible to be isolated.

The Clients relate to its providers across its mobile, tablet, PC, etc., and contribute large number of information that generates the companies an important extra cost that till now does not take advantage and the Hotel trade he can be of benefit of it

Technology of 4 layers Client, Web, Logic of Business and Database. Using in its joint free software, into which we have incorporated our own developments to him. In the different layers it has been used between other hardware: Eclipse, Hibernate, Tapestry, Tomcat, HTML 5, CCS3, Java, Java-script, Spring, MySQL...

All the screens of Unputt of information, they are responsivas valid for any device (mobile, Tablet, Portable...). An elegant design, of easy comprehension for any type of user. Web accessibility, with a navigator he will gain access to the whole system from any place. We incorporate utilities of last technology (Geolocation, Beacons, Sockes, WhatsApp, developing Reality...), we are in continuous feed-back with the last changes of the Market, to improve, to incorporate and to give the best solution that we are demanded.

Why Class One?
Technology and Integration

Class One

Technology

Technological advancements shape our Company's culture. Day by day it's becoming less common to perform daily tasks without using technology, and it is not possible to be isolated.

Customers interact with their suppliers through their mobile phone, tablet, PC, etc., and contribute with a great deal of information that generates for companies an added value that wasn't being used and the Hotel industry can benefit from it.

Class One

Since 1990, and based on our experience, we have developed 4.0 systems, which give full solutions to the new scenarios. It is imperative to interact with the Customer as this is the pillar that sustains the Sector. Non-face-to-face management control, loyalty incentives, CRM, Business Intelligence, etc. And above all, technology that any business manager can handle.

The loyalty of our customers is basic to increase the margins in Hospitality

The use of **technology** and **integration** by **Class One** is essential to obtain greater profitability of your business.

Class One headquarters is based in La Coruña, the Class One Group also has staff in Madrid, Levante, Canarias and Andorra as well as other delegates, Group companies and distributors abroad.

Integration

All products integrate with each other, as if it were a puzzle to form a single product according to the characteristics of the final Client.

The puzzle of the Class One systems are integrated into each other forming a different product for each establishment.
